Content

The extract files are created monthly in tab-delimited ASCII text file format and contain:

- **Official voter registration information.** This information is extracted from the Florida Voter Registration System (FVRS). The information in the monthly extract reflects voters (active and inactive only) registered officially as of the end of the prior month. Confidential and/or exempt information IS NOT included. See e.g., Section 119.071, Fla. Stat.; Section 97.0585, Fla. Stat. Additionally, pre-registered voters and registered voters who are participants in the Attorney General's Address Confidentiality Program pursuant to 741.401 – 741.465, Fla. Stat., are also not included in this extract.
- **Voting history information.** This extract contains the prior 10 years of official voting history¹ for federal and state elections and the prior 10 years of unofficial voting history for local elections. All voting history for each voter is included in the county file where the voter is currently registered. Some of that voting history may have occurred in prior county of residence/registration. The voting history corresponds to what was recorded by the county under the voter ID associated with the voter at the time of voting.
NOTICE: Official voting history may not be available on an extract file until the month subsequent to the month in which official voting history was due. As with any records, discrepancies may appear to exist, data entry or administrative errors may have been addressed since the end of the prior month or since the file was created.
